Subject: Call with North American Land Trust

Flag: Follow up

Hi Doug,

I hope you're doing well.

As you know, for a long time I've had an interest in the role that land trusts can play in redeveloping contaminated property. Yesterday, I had a great conversation with Steve Carter, President of the North American Land Trust about this. I wanted to introduce the two of you and see if you'd be interested in us all having a conversation to see if land trusts and industry can work together to help preserve land and promote redevelopment.

As you know, EPA has expressed interest in creative strategies like conservation easements to support site redevelopment and Steve has expressed interest in working with more companies and redevelopers on contaminated properties. Please let me know if you're interested and I'll set up a call.

Steve Carter is the President of the NALT which was involved in the Santa Susana site in California.

Steve – Here's a link to the project that Doug and I worked on together in Florida.
